Vendor Segmentation: Margin vs. Turnover

Bulk Purchasing Impact on Unit Price

Recommendations: Renegotiate freight with high-cost vendors, Shift to bulk ordering where feasible. Promote high-margin, low-sales brands instead of repricing. Diversify beyond top 10 vendors. Monitor turnover to prevent slow-moving stock from eroding margins. Statistical tests confirm low-sales vendors deliver significantly higher margins (CI: 40.5–42.6%) vs. high-sales vendors (CI: 30.7–31.6%).
